JOINT WATER MASTER PLAN
Identify Issues & Opportunities

Identify the issues and opportunities that you support. Use a dot or sticky note to elaborate on your answer.

Scan for more information and to share your ideas.

Accomodate capacity growth	Improve supply reliability and resiliency	Adaptively plan for possible future conditions and changing demands	Promote water conservation and efficiency	Optimize existing infrastructure

Purpose

The regional water supply system delivers drinking water to Abbotsford and Mission. As described in each city's Official Community Plan, the combined population is anticipated to exceed 300,000 over the next 25 years.

The Joint Water Master Plan will evaluate the long-term capacity and reliability of the system, consider climate uncertainties, and identify infrastructure actions to support community development in a cost-effective and sustainable manner.

System Overview

The existing system consists of:

Norrish Creek Water Treatment facilities

Cannell Lake Water Treatment facilities

Groundwater production wells

Finished water strorage facilities

Water transmission pipelines > 95 kilometres
