1 PROJECT OVERVIEW: NEW PEPIN BROOK PARK WATER FEATURE

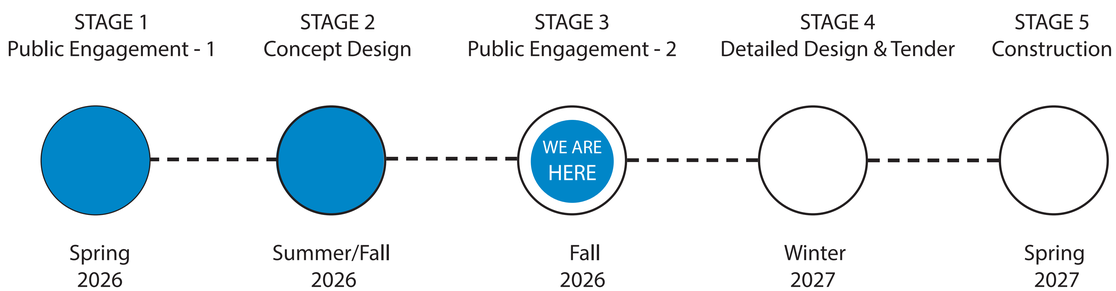

WHAT'S HAPENNING

The City of Abbotsford is planning a new water feature at Pepin Brook Park to provide additional opportunities for cooling and recreation for residents. The project is being designed at a modest scale in response to community feedback. The design reflects the character of the park and the function it provides as a neighbourhood park.
This small-scale water play and cooling feature will serve the park while remaining compatible with the character and amenities of the park.

EXISTING SITE AND PROJECT LOCATION

PROJECT PROCESS

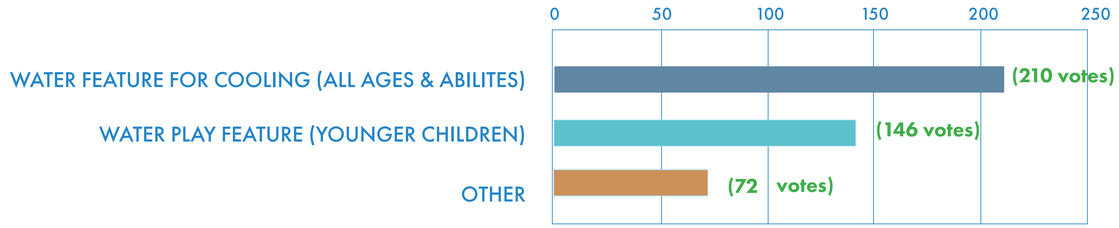

WHAT WE HEARD

In the Spring of 2026, the City conducted a Public Online Survey, for the proposed water feature at Pepin Brook Park.

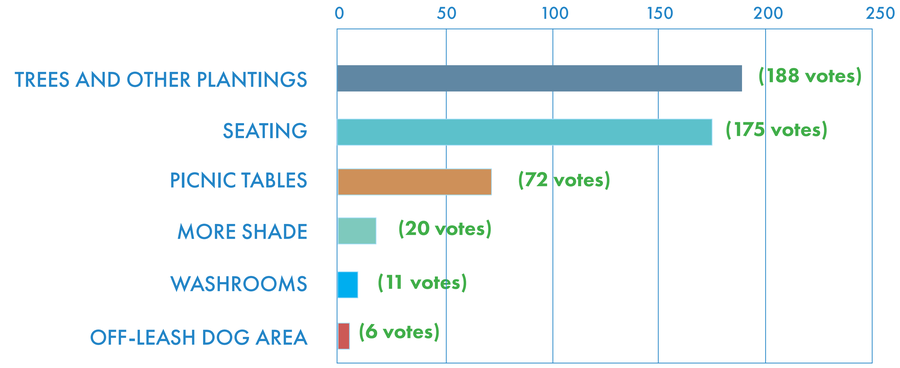

291 SURVEY RESPONSES

176 RESPONDENTS LIVE WITHIN WALKING DISTANCE OF THE PARK

What water features do you think would be most valued in the park?

What other amenities you think should be added to the park?

IMPORTANT DESIGN CONSIDERATIONS

1. Most residents prefer water features that serve all ages and abilities.
2. Residents noted that more cooling and shade opportunities are needed throughout the park.
3. Residents support water features that fit the park's neighbourhood scale and meet local needs.
