Dear: Owner/Occupant:

Re: Fishtrap Creek Integrated Stormwater Management Plan (ISMP)

The City of Abbotsford is conducting a survey of Fishtrap Creek and its tributaries, for Fishtrap Creek Integrated Stormwater Management Plan (ISMP).

The purpose of the ISMP is to develop an action plan for protecting and improving watershed health and addressing the current issues in the watershed. The ISMP process preserves the watershed health as a whole, while meeting our community's needs and allowing developments and re-developments to occur. More information can be found at www.abbotsford.ca/fishtrap.

As part of this project, the City of Abbotsford's survey crew will be conducting a survey of storm sewer/culverts/bridges at various locations. This may require the survey crew to briefly pass through your property as they access or survey along the ravine or a storm sewer. The field work will take place from September until the end of October 2019. If you have a locked gate, the crew will set up a survey schedule with you upon receiving your contact information.

We appreciate your cooperation in accommodating this work. Should you have any questions or concerns regarding the survey work, please contact me at 604-853-2281 extension 5391 or email kzhang@abbotsford.ca.

Sincerely,

Katy Zhang, P.Eng.
Drainage Engineer
