Understand community risk and expectations

Align fire rescue services with community growth

Improve emergency response and public safety outcomes

Support resilience during major emergencies

Abbotsford Fire Hall Locations

Purpose

The purpose of the Fire Rescue Service Master Plan is to identify the equipment, service, staffing and facilities upgrades and investments needed to support Abbotsford growing and changing community over the next 25 years. The plan will help ensure Abbotsford Fire Rescue Service (AFRS) can continue to provide safe reliable and effective emergency response, fire prevention, rescue services and public education as the City grows to a population of 250,000.

The plan will also ensure fire rescue services align with the vision set out in the updated Official Community Pan, support community resilience during emergencies and disasters and identify priorities for future investments in fire halls, equipment, training and emergency response capabilities.

AFRS Mission
We are committed to building a resilient community through proactive prevention, rapid response, and relentless pursuit of excellence.

AFRS Vision
To serve with compassion and integrity, promoting safety in our community.
