TRANSPORTATION MASTER PLAN
Identify Issues & Opportunities

Identify the issues and opportunities that you support. Use a dot or sticky note to elaborate on your answer.

Scan for more information and to share your ideas.

Accommodate population growth and increased travel demand

Identify and address key road safety concerns

Improve infrastructure to enhance transit

Identify gaps and improve accessibility to alternative transportation in all neighbourhoods

Address Impacts of Highway 1 construction on local roads and identify opportunities to improve transit/ transportation with new infrastructure

Purpose

The Transportation Master Plan will guide how people and goods move around Abbotsford over the next 25 years, whether by bike, bus, foot, mobility device, or by car.

The Plan will identify transportation improvements needed to support a growing population of 250,000, align with the vision and goals of the updated Official Community Plan, set priorities for future investments, and help ensure the transportation network remains safe, accessible and efficient.

System Overview

The City's transportation network supports all modes of transportation. It includes:

1000+ kilometres of roads

175+ traffic signals

17 local bus routes

275 kilometres of trails & pathways

100+ kilometres of cycling facilities

The Master Plan will include:

- A transportation vision and measurable targets for the next 25 years
- Active transportation networks (for walking and cycling)
- Updated road networks and truck routes
- A data driven road safety strategy
- A list of infrastructure projects for the short-,medium- and long-term

The Master Plan will also coordinate transportation initiatives with regional partners and plans and consider the mobility needs of seniors, people with disabilities, low-income households, and other groups.
